Abstract

This study investigates the influence of scholarships on academic performance and motivation among APU students. Using online surveys, the research examines the relationship between financial support and educational outcomes, providing insights into the effectiveness of scholarship programs.

Introduction

Financial constraints often affect students' academic performance and motivation, making scholarships a crucial form of support. This study examines the impact of scholarships on APU students, focusing on how financial aid influences study habits, academic achievements, and motivation. By analyzing student responses, we aim to provide valuable insights into the effectiveness of scholarships in improving educational quality.

Significance Of Study.

- Explores how scholarships impact academic performance and motivation.
- Helps universities improve financial aid programs.
- Provides insights for students on scholarships' role in study habits.
- Assists educators in understanding financial support effects.
- Guides policymakers in refining scholarship criteria.
- Supports discussions on educational equity and student success.

Methodology.

The influence of scholarships on APU students is investigated in this study using a quantitative methodology. Merit-based scholarship awardees make up the sample group; at least 20 respondents from different programs participated. An anonymous online survey using Google Forms will be used to gather data. It will include structured questions with multiple-choice and Likert scale items.

Findings

- Majority **60% (28%+32%)** reported a significant improvement in academic focus.
- **24%** indicated moderate influence, suggesting some benefit but not drastic.
- **16% (8%+8%)** experienced minimal or no impact, possibly due to external factors.

- Majority **80% (28%+52%)** reported a significant improvement in committing to long-term academic goals.
- **12%** and the other **8%** indicate some of the influence on committing as well.

- Majority **72% (32%+40%)**, reported significant satisfaction with the current scholarship policies at APU.
- **16%** indicated very high satisfaction, suggesting the policies meet their expectations.
- **12% (4%+8%)** experienced low or no satisfaction, possibly due to unmet financial needs or other concerns.

Recommendation

- Give More Scholarships – Offer more financial aid to help more students.
- Make Scholarships Easy to Find – Share clear information about scholarships and how to apply.
- Encourage Good Grades – Require students to maintain good academic performance to keep their scholarships.
- Offer Extra Benefits – Provide internships, training, and networking opportunities.
- Support Student Well-being – Offer counseling and encourage a balance between studies and activities.
- Help with Career Growth – Support research, competitions, and career development programs.
- Review and Improve – Regularly check the impact of scholarships and get student feedback to improve them.

Conclusion

This study investigates the impact of scholarships on academic performance and motivation among APU students through online surveys. The findings show that most students experienced a positive effect on their academic focus, while some reported moderate or minimal influence. Overall, the research highlights the effectiveness of scholarships in enhancing students' educational outcomes.
